

AUTONOMOUS VOICE AI SOLUTIONS

Targeted Communication Architectures & Performance Pricing

Never lose another lead to a competitor. By pairing a 24/7 Voice AI front-desk receptionist with our instant missed-call text-back system, **Never Miss a Call** deploys a Dual-Catch Net for your business. If the phone line is busy or a prospect hangs up early, the text automation catches them instantly.

 **The Dual-Catch Guarantee:** All tiers are deployed natively with our secondary SMS backup system. If your caller hangs up before finishing the conversation with the Voice AI, **Never Miss a Call** automatically texts them within 30 seconds to lock in the lead via SMS.

1. High-Demand Niche Portfolio

Handymen & Independent Contractor Services

The Problem: Solo operators or small teams working on-site cannot pick up the phone while managing active jobs, leading to bleeding leads.

The AI Solution: Intercepts missed calls natively, handles quote booking criteria, takes project summaries, syncs with a mobile calendar, and updates client records.

Investment: **Setup: \$750** • **Retainer: \$197/mo**

Real Estate Agents & Realtors

The Problem: Agents are constantly driving or showing houses. When an online lead calls about a property, they expect an immediate answer, or they call the next agent.

The AI Solution: Acts as your personal assistant. Captures the lead, asks if they are looking to buy or sell, logs their timeline and budget, and books a call on your calendar.

Investment: **Setup: \$750** • **Retainer: \$197/mo**

Bail Bondsmen

The Problem: Arrests happen 24/7, and every call is a high-stakes emergency. If you don't pick up on the first ring at 3:00 AM, families will immediately call the next agency on Google.

The AI Solution: 24/7 instant dispatch. Collects the defendant's name, booking number, facility location, answers basic fee questions, and instantly pings the bondsman with the lead data.

Investment: **Setup: \$950** • **Retainer: \$297/mo**

Real Estate Investors (REIs) / Wholesalers

The Problem: Inbound motivated sellers are call-shopping. If you don't answer their first call, they immediately call the next investor on Google.

The AI Solution: Fields inbound marketing calls, pre-qualifies property condition, asks for the desired asking price, handles basic structural questions, and updates your CRM pipeline.

Investment: **Setup: \$950** • **Retainer: \$250/mo**

Law Firms & Independent Attorneys

The Problem: High cost of intake staff listening to non-viable cases, balanced against the risk of missing a high-value client inquiry while attorneys are in court.

The AI Solution: Conducts structured legal intake. Screens case criteria dynamically, filters out conflicts of interest, maps details cleanly to legal CRMs, and schedules consultations.

Investment: **Setup: \$1,200** • **Retainer: \$397/mo**

Property Management & Corporate Landlords

The Problem: High administrative overhead filtering tenant inquiries from critical after-hours maintenance emergencies (leakage, HVAC issues).

The AI Solution: Triage dispatcher. Filters standard tenant FAQs from urgent issues. Seamlessly cross-references service rules and loops in local property maintenance logs.

Investment: **Setup: \$2,500** • **Retainer: \$997/mo**

2. Implementation Category Matrix

We classify installations across transparent operational tiers based on data paths and integration depth:

CATEGORY TIER	SETUP / RETAINER	SYSTEM FEATURES	IDEAL FOR
Standard Tier	\$750 Setup \$197/mo	Connects to your booking calendar, takes down caller details, and answers basic common questions.	Handymen, solo contractors, real estate agents.
Rapid Response Tier	\$950 Setup \$297/mo	24/7 instant emergency dispatch. Collects critical details and immediately pings operators via text/email.	Bail bondsmen.
Pro CRM Tier	\$950 – \$1,200 Setup \$250 – \$397/mo	Organizes leads directly into your sales software, asks smart qualifying questions, and checks for scheduling conflicts.	Real estate investors, law offices.
Advanced Triage	\$2,500 Setup \$997/mo	Acts as a full 24/7 dispatcher. Sorts emergencies, automatically calls outside contractors, and transfers urgent calls.	Property management, corporate accounts.
